

Burnley College Media

BTEC Level 2&3 in Creative Digital Media

The level 3 BTEC media course is a 2 year 100% practical project-based course with no exams. The course aims to build your creative planning, directing, and editing skills while making media productions. We set high expectations and promote multiple opportunities for professional work experience, improving your employability and readiness for university. We help develop your skills and set you on your path to working in your chosen sector of the media industry, from film and TV to photography, graphic design, advertising, journalism, animation, game design, publishing and marketing. You will learn research, developing ideas, planning, photography, filming techniques, lighting, video editing, media theory, photo editing, graphic design, and many more skills.

During the course, you will create multiple short films, music videos, digital magazines & posters as well as video & photographic adverts.

You will be taught by team industry professionals with over 50 years of teaching experience between them. Our lessons are very practical and make full use of our excellent camera, studio and computer equipment. The media content you create will be added to our Burnley College Youtube channel and will be exhibited in our end of year Oscars awards.

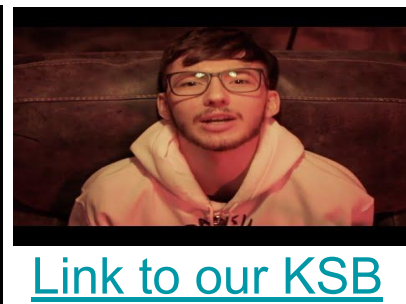

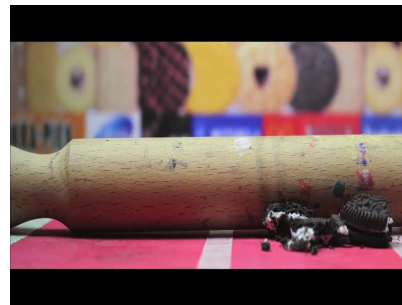

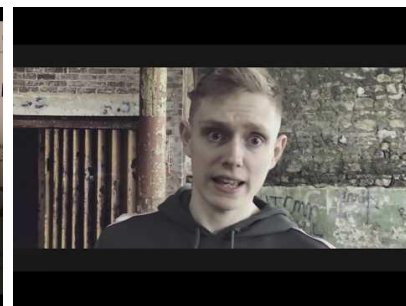

Today you might be just watching Netflix, but this course will help you be the content creators of the future!

Jason Frost: Media and computing program leader
